

## Swine Genetics Internship Opportunity I

Topigs Norsvin, the world's most innovative swine genetics company is seeking a talented undergraduate or graduate student with an interest in animal breeding and genetics to participate in a paid 10-week internship program for the summer of 2019. During the internship experience, based at a production facility in the Midwest, the student will work with members of the Topigs Norsvin team in project data collection and analysis. The internship will further include exposure to various support entities such as Technical Support, Sales, and Accounting as time allows. This is an excellent opportunity to develop business, communication, and collaborative skills while establishing a network of industry professionals.

### Responsibilities:

- General animal husbandry duties in a commercial production facility
- Genetic data collection duties under the supervision of Topigs Norsvin personnel
- Genetic data management duties under the supervision on Topigs Norsvin personnel

### Qualifications:

- Undergraduate or graduate student pursuing a degree in Genetics, Animal Science, or related field
- Eligibility to work in the U.S.
- Prior swine experience preferred but not required
- Excellent written and verbal communication skills
- Ability to work independently and in a team environment
- Detail-oriented
- Able to adapt within a sometimes fast-paced environment

### Schedule and Compensation:

- Competitive hourly wage
- Housing provided

To apply for this position, please submit a resume or CV, cover letter, unofficial transcript, and one letter of support from an academic or professional contact by Feb. 15, 2019 to:
